

“The Best Toilet We Have Ever Owned”

Simple, Sleek & Clean

Cuts Household Water Consumption by 27% - Saving You Money

Protects Your Lake & Your Septic System

The Water Matrix – Proficiency Toilet

“I tried the first low flush toilets and was not happy – **I love this toilet**”

We bought it for our lake and our budget – we love it for easy cleaning and easy use – Paul MacInnes – Chair of the C.H.A.

A Canadian Invention – by Canadian inventor Phil Hennessy

Saves 45,625 litres of water each year

This 3 litre toilet works better than many 13 litre flush toilets.

See reverse side for water savings Chart

If every household in Canada installed a 3 litre flush toilet, the average water savings could be:

- **2.2 billion litres per day - in Canada**
- **180 litres per day - in a typical household**
** based on 5 flushes at home per person per day & 2.5 people per household=4,562 flushes per year per house*
